

Versa Connect

Designed with families in mind

Versa Connect

“The Ford Tourneo Connect is a relaxing and comfortable place to be. Great to drive, great to sit in, it boasts premium finishes, high quality materials and fuel efficiency without compromising everyday practicality.”

The Versa Connect takes these attributes and focuses on extending them seamlessly into the wheelchair accessible aspects of our vehicle. It is our aim to produce a conversion that is both practical and stylish, with an attention to detail that provides the same high quality look and feel throughout the vehicle.

The Versa Connect is available in two wheelbases. The Short Versa Connect can accommodate the wheelchair user and up to 3 seated passengers (including the driver) or up to 5 seated passengers without the wheelchair.

The Long Versa Connect can accommodate the wheelchair user and up to 5 seated passengers (including the driver) or up to 7 seated passengers without the wheelchair.

Twin sliding doors allow for ease of passenger access with a lightweight manual ramp to the rear for wheelchair access. As an optional extra, the ramp can have the added ability, using a simple lever, to fold-flat into the vehicle so that when the wheelchair user is not travelling, a huge and easily accessible boot space is created making the Versa Connect even more practical.

Designed with families in mind

Bolster: Malt in Medium Stone

Vehicle Layouts

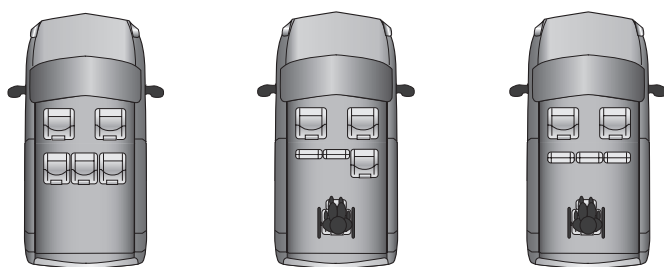

The beauty of the Versa Connect is its versatility. The Short Versa Connect retains the original Ford 60/40 folding seats. The seats fold and tip to maximise luggage area and tilt to optimise passenger comfort. The seats can either be tipped entirely forward to allow space for the wheelchair user behind the driver and passenger or, depending on the size of the wheelchair, one of the rear seats can be retained and the wheelchair user sit just behind.

The Long Versa Connect offers even more seating options. Either the original Ford 60/40 folding seats can be retained with the wheelchair user sitting behind, or the 60/40 seat can be removed and replaced with two individual detachable seats which allow the wheelchair user to sit a little further forward in the vehicle. One or two additional tip & fold seats can also be added as a third row where extra seating is required.

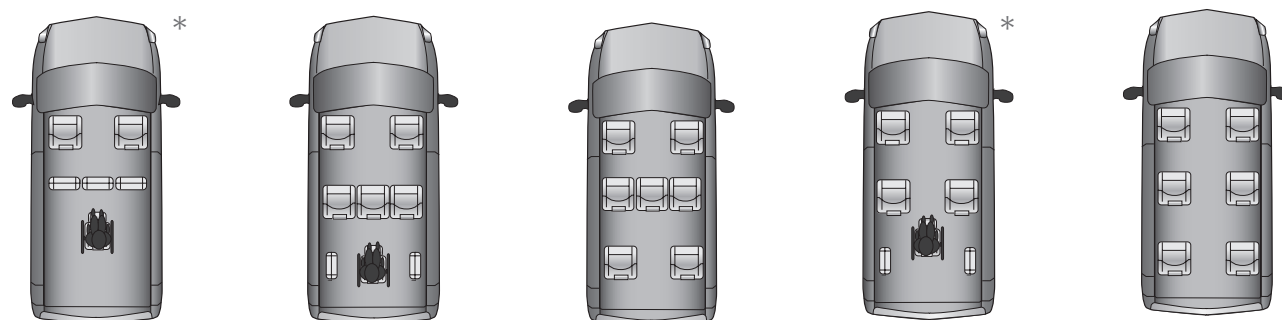

The original Ford seats and the tip & fold seats come as standard with the added safety of ISOFix mountings. ISOFix can be added to the detachable seats as an optional extra.

All the seats we supply are full size seats. Therefore whether the original Ford seats are retained or new seats are added, all passengers are assured of the most comfortable ride.

Short (based on Ford Tourneo Connect)

Long (based on Ford Tourneo Grand Connect)

* Wheelchair user can sit a little further forward (not as far forward as Row 2 seats)

Critical Dimensions

	Short	Long
Entry height.....	1,373mm	1,373mm
Ramp length.....	1,010mm	1,010mm
Ramp width.....	755mm	755mm
Channel length.....	1,580mm	1,580mm
External height.....	1,852mm	1,845mm
External length.....	4,418mm	4,818mm

Optional Extras

Conversion Extras	Description
Futuresafe	Head and back support for the wheelchair user to give the same level of safety protection to all passengers
Winch	Wireless remote operated winch to allow wheelchair users or carers to load or unload wheelchairs and their occupants in a safe manner and with the minimum of effort
Puncture protection	Punctures are inconvenient, costly and potentially dangerous. We can install a tyre sealant system into your Versa Connect to give you the peace of mind that if a puncture does occur, it will be sealed immediately with no loss of pressure or danger to your occupants. The seal will last until the end of the legal life of the tyre
