## Mobility experts you can trust

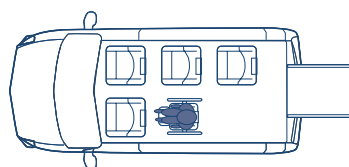

# Volkswagen Caravelle WAV

The wheelchair accessible Volkswagen Caravelle by Versa can accommodate the wheelchair user and up to five seated passengers (including the driver) if fitted with a tail lift, or up to six seated passengers if fitted with a side lift. If more space, or an additional wheelchair position is required, a long wheelbase version is also available. Alternatively the vehicle can be configured with fewer seats, accommodating more space for the wheelchair user and leaving room for luggage, shopping or other equipment. Entry for the wheelchair user is a choice of an electric tail lift, or underfloor electric side lift. Rail-mounted seating makes the interior versatile enough for numerous layouts, also enabling families to be accommodated with practicalities like ISOFix seats in the rear. Choose from automatic or manual transmission to suit your requirements and SE or Executive trim.

Features include touch screen DAB radio, Bluetooth, AUX & USB connectivity, air conditioning with Volkswagen's roof-mounted ventilation system, autonomous emergency braking (AEB) and alloy wheels.

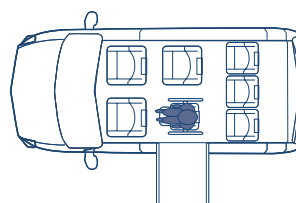

## Vehicle Layouts

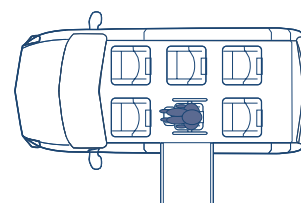

Standard tail lift conversion with two seats in the rear and one wheelchair position.

Maximum seating with tail lift.

Side lift entry offering additional seating in the rear.

Alternative seating layout with side lift.
