Volkswagen Caddy Maxi WAV

The wheelchair accessible Volkswagen Caddy by Versa comfortably and safely accommodates the wheelchair user and up to five seated passengers (including the driver). Twin sliding doors allow for ease of passenger access with a lightweight manual ramp to the rear for wheelchair access which can also be upgraded to fold flat into the vehicle. This means that when the wheelchair user is not travelling, a huge and easily accessible boot space can be created.

The Caddy is available in manual or automatic transmission and available as either petrol or diesel.

Features include anti-lock braking system (ABS), touch screen DAB radio with Bluetooth, AUX & USB connectivity, autonomous emergency braking (AEB), cruise control, start stop technology and auto headlights & auto wipers.

Vehicle Layouts

The Volkswagen Caddy retains the original Volkswagen seats with the wheelchair user sitting behind and as such can accommodate up to five passengers, including the driver, plus the wheelchair user.

The three-seat bench in the second row has the versatility to be split, folded or completely removed. Retaining the original seats ensures that passengers in the rear of the vehicle have the most comfortable ride on full size seats.

Top Features

- Lightweight two-piece ramp with optional fold-flat design creating a useful boot space
- Aluminum wheelchair channel is robust and avoids wear and tear
- Three-point inertia seatbelt for wheelchair user
- Four-point wheelchair securing
- Original manufacturer seats with ISOFix
- Rear speakers
- 12v power socket in wheelchair user area
- Air conditioning
- Alloy wheels
- Metallic paint as standard for Motability customers
