Citroën Berlingo WAV

The wheelchair accessible Citroën Berlingo by Versa can be converted with two different layouts. Our 'Bench' conversion can accommodate two seated passengers (including the driver) and one wheelchair user or five seated passengers when the wheelchair user isn't travelling. Our 'Basic' conversion can accommodate up to four seated passengers (including the driver) and one wheelchair user. Twin sliding doors allow ease of passenger access to the spacious rear seating area. A lightweight manual ramp is fitted to the rear for wheelchair access which can be upgraded to fold flat into the vehicle. This means that when the wheelchair user is not travelling, a large and easily accessible boot space can be created. ISOFix mountings are available on all seats in the rear meaning the whole family can travel safely. The Berlingo is available in manual and automatic transmission with a choice of petrol or diesel to power your drive.

Features include an 8" touchscreen with DAB digital radio, USB & 12 volt socket, Bluetooth handsfree & media streaming, cruise control & speed limiter, electric & heated door mirrors and Citroen's popular Airbump design.

Vehicle Layouts

Standard 'Bench' conversion allows for driver, front passenger and the wheelchair user, or 5 passengers when the wheelchair user isn't travelling.

Maximum seating on the standard 'Bench' conversion when the wheelchair user isn't travelling.

Alternative 'Basic' conversion allows for 3 or 4 passengers (including driver) and one wheelchair user.

Top Features

- Single piece lightweight ramp with optional fold-flat design creating a useful boot space
- Four-point wheelchair securing with retracting rear restraints and a three point inertia seatbelt for the wheelchair user (with optional height adjustment)
- Optional winch assist
- Metallic paint and air conditioning as standard for Motability customers
