

# Rear Compartment Lighting

Your vehicle is fitted with additional lighting in the rear compartment to supplement and operate in conjunction with the vehicle's original cabin lights.

- When they are in the On position, the lights come on when a door is opened (front, side or rear doors)
- When the doors are closed, the lights turn off with the original vehicle's (i.e. on a timer)
- Each individual lamp can be switched off separately by clicking the lens to the centre position (On-Off-On operation)
- A rocker is situated on the dashboard that can override the system to turn all the lights on when all the doors are shut (however individual lights in the off position will remain Off)
- At all other times, the dashboard switch should remain off for normal operation

## Important Notes

Leaving lights turned on for extended periods of time without the engine running may flatten the vehicle's battery

If you have any questions about your vehicle, please do not hesitate to call us on 01924 442386 or email at [customerservices@bristolstreetversa.com](mailto:customerservices@bristolstreetversa.com)
