

# PortaRamp Vehicle Access Ramp

Your vehicle is equipped with a PortaRamp Clearview ramp that is light in weight and easy to use, and also allows visibility out of the rear window when stowed in the vehicle.

## Ramp operation

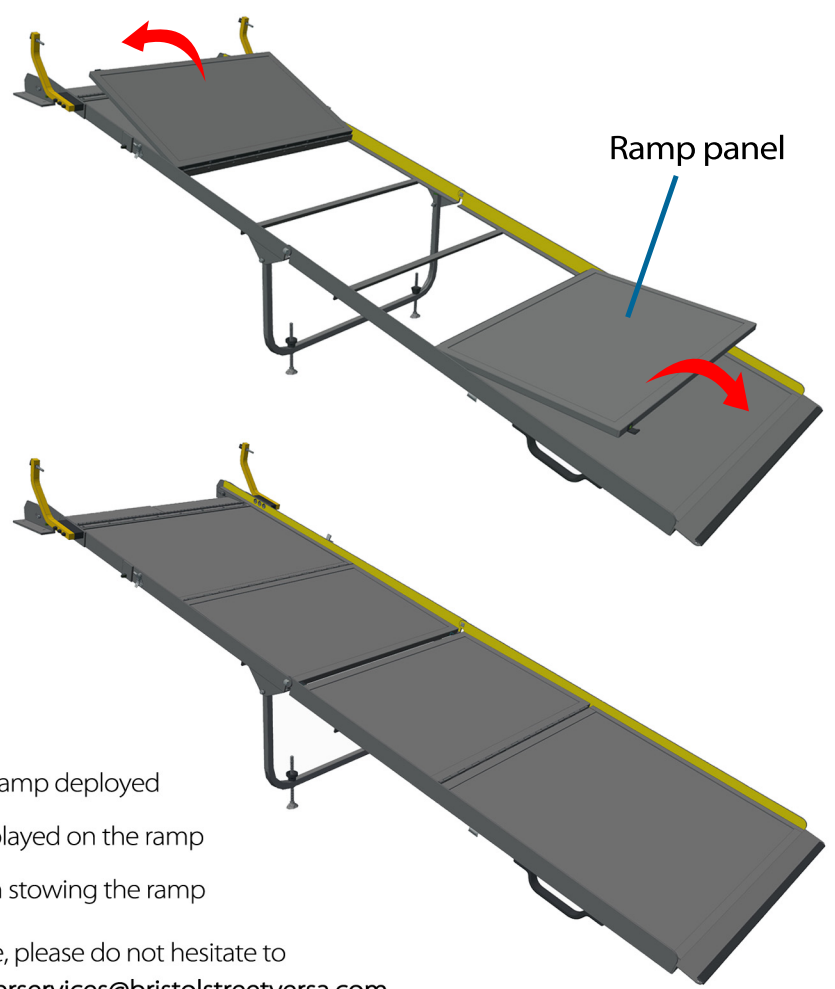

To deploy the ramp, fold out the ramp whilst deploying the swing out leg. Ensure the leg is vertical and on a level surface

Undo the catches and unfold the bottom section of the ramp

Fold out the ramp panels to complete the ramp surface

Stowing the ramp is the reverse of the deploying. Ensure the catches are secured before folding the ramp back into the vehicle

When in the upright (stowed) position a gas spring and two 'legs' prevent the ramp from moving

## Important Safety Notes

**Do not** attempt to drive the vehicle with a ramp deployed

**Respect** the safe working load which is displayed on the ramp

**Always** ensure the catches are secure when stowing the ramp
